-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 May 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Art Unit: 2816

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by applicant's admitted prior art.

Instant Fig. 1 shows the first and second pre-drivers as circuits 100 and 110, respectively; and the pull-up/pull-down transistors as FETs 11 and 12, respectively. The second and fourth signals provided to the gates of FETs 11 and 12 have their slew rates inherently controlled by the first and second pre-driver circuits 100 and 110, respectively.

The resistance components of claim 16 are elements 12 and 13.

3. Claim 1 is also rejected under 35 U.S.C. 102(b) as being anticipated by Taito.

Art Unit: 2816

Note Fig. 5 which shows the first and second pre-drivers as circuits 51 and 52, respectively; and the pull-up/pull-down transistors are the FETs which receive V1 and V2, respectively (i.e., FETs 12 and 13, as shown in the other figures of Taito). The second and fourth signals provided to the gates of these FETs have their slew rates inherently controlled by the first and second pre-driver circuits 51 and 52, respectively.

The recited resistance components of claim 16 read on the wire connections between FETs 12 and 13.

4. Claims 2-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth B. Wells whose telephone number is (571)272-1757. The examiner can normally be reached on Monday through Friday from 8:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy P. Callahan, can be reached at (571)272-1740. The fax phone number for the
